

Episode 1

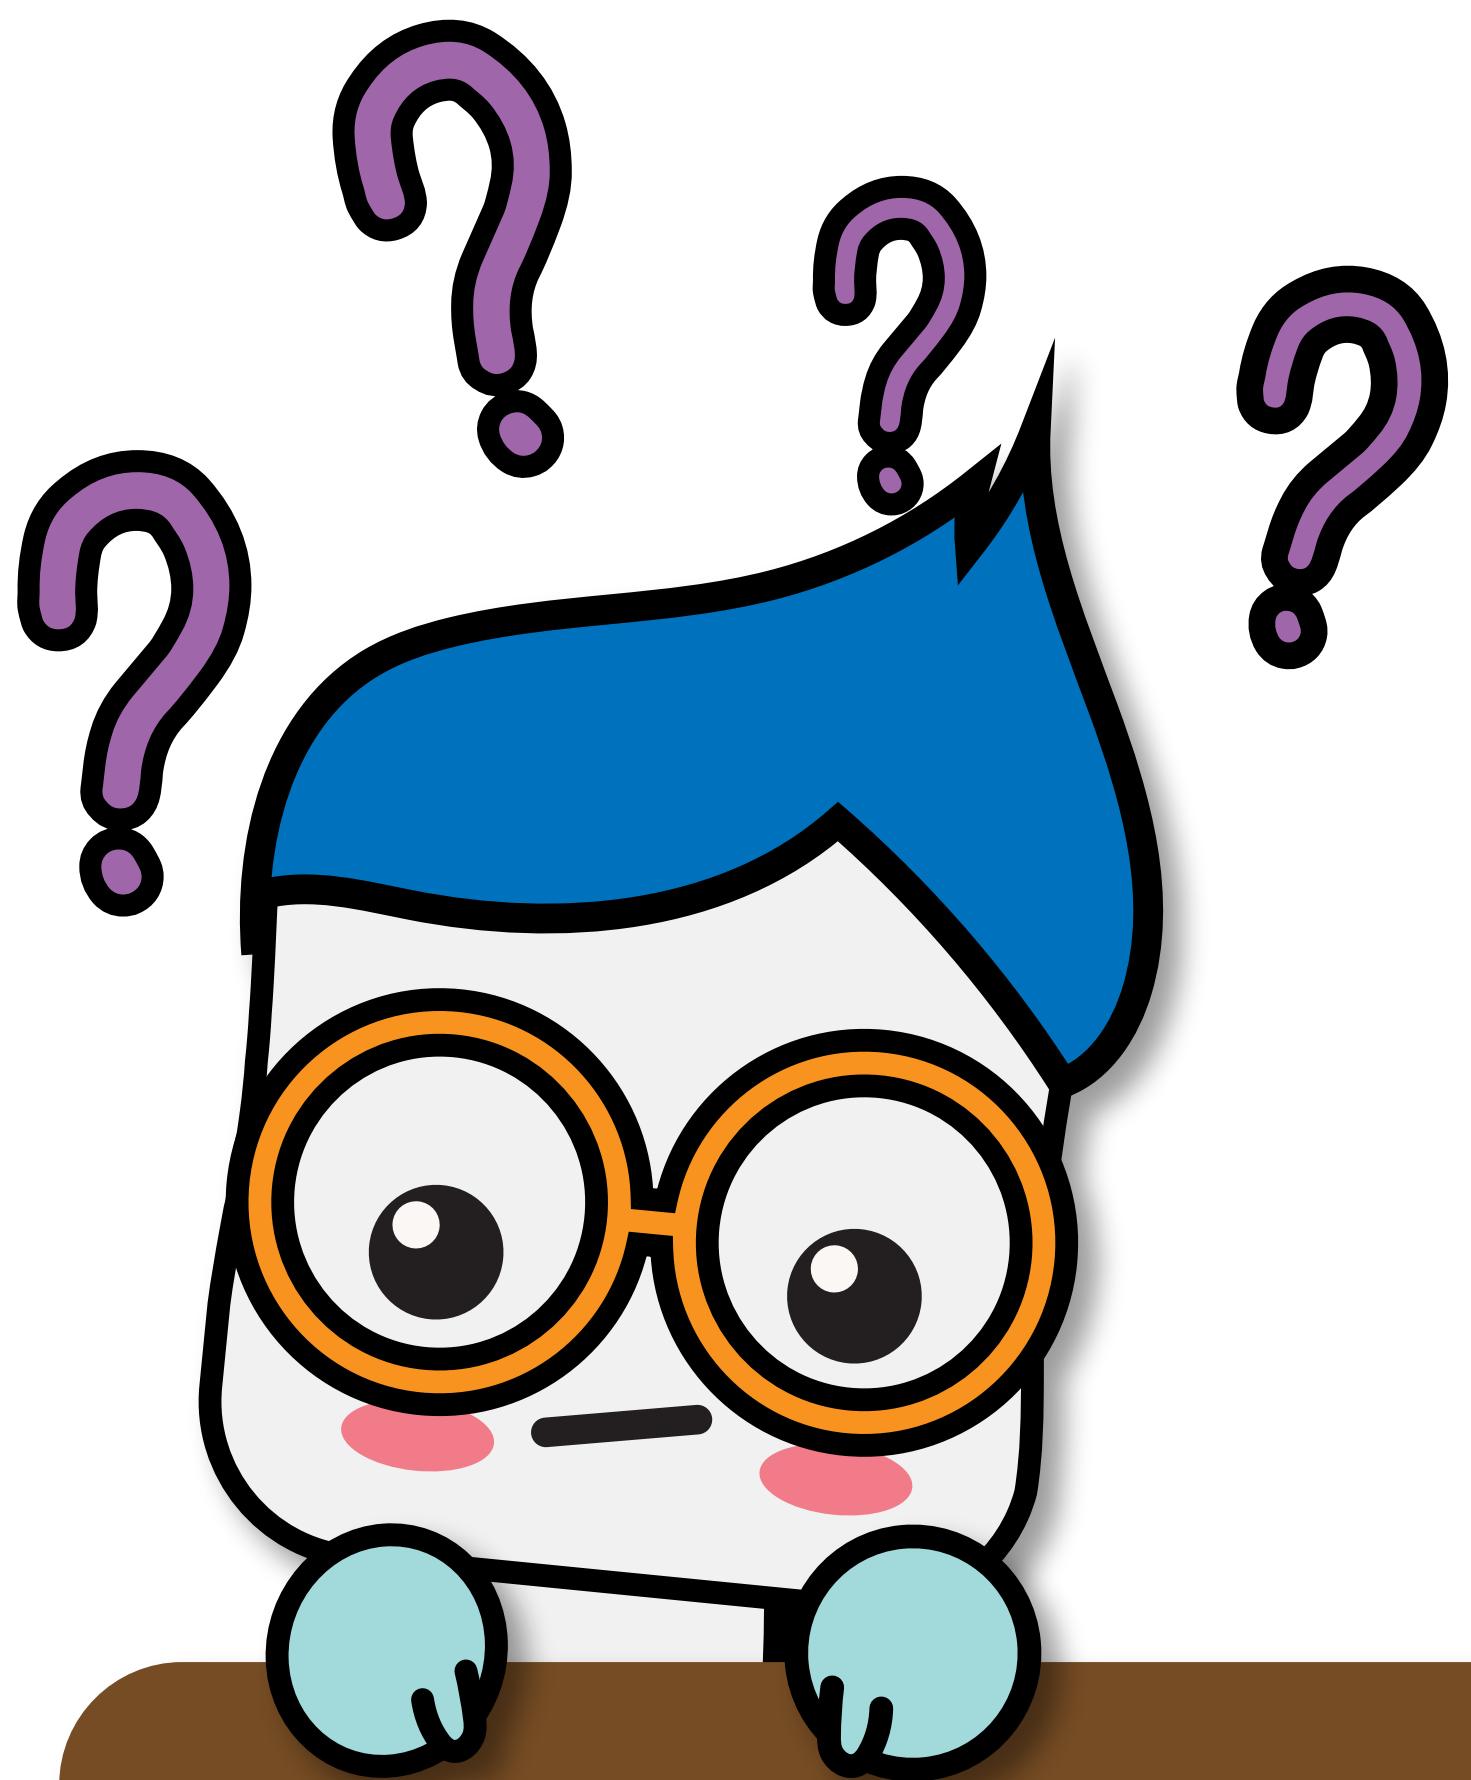

THE INCREDIBLES FNXBoys

How to mine FNX
and maximize
the rewards?

MINING FNX is SIMPLE!

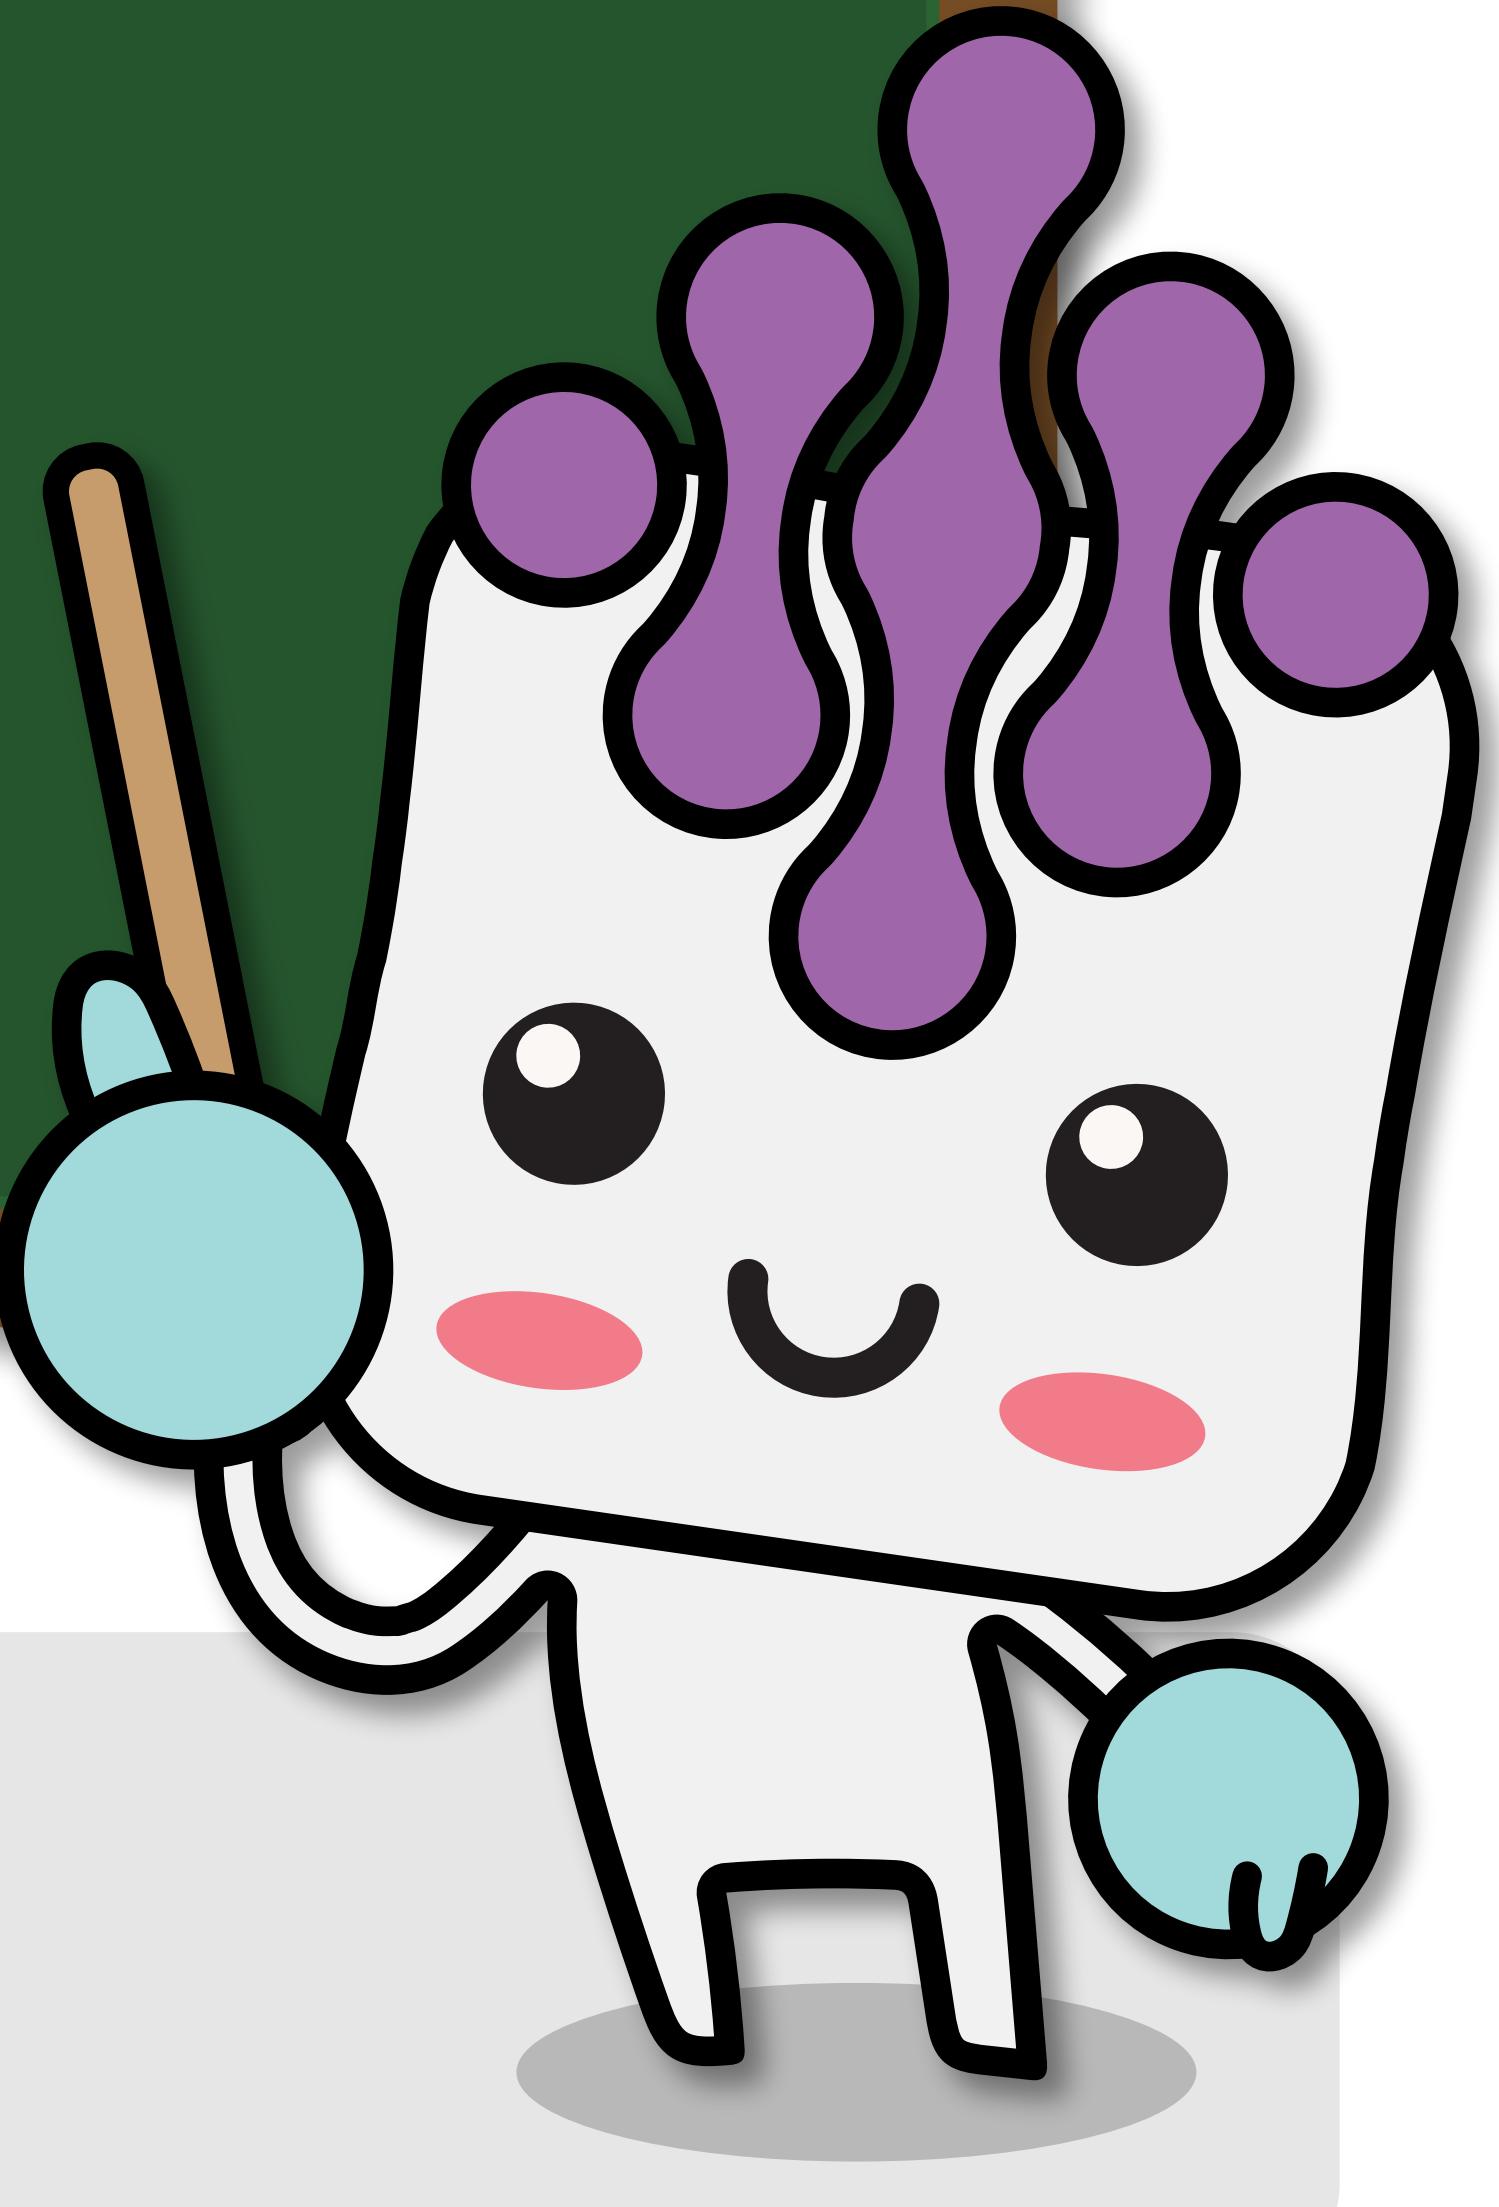

How can I
maximize my
rewards?

Mining Reward =

Base Reward

\times

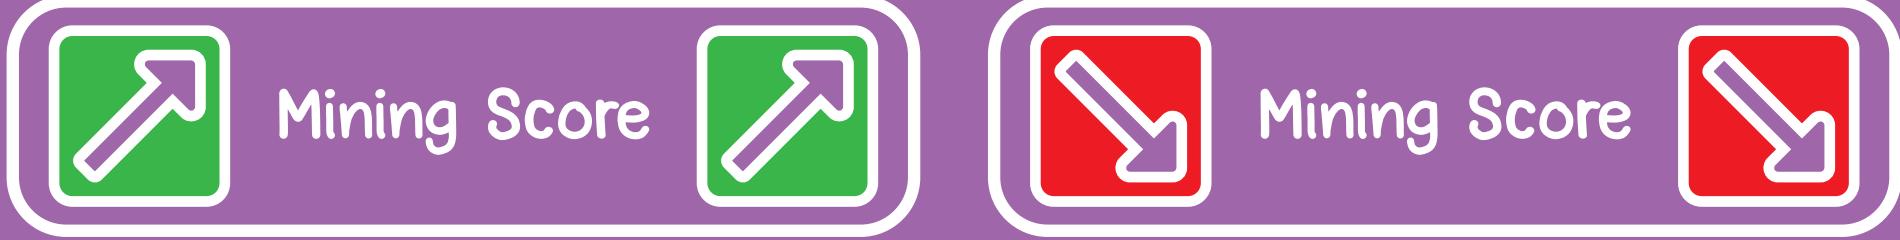

Lock time
modifier

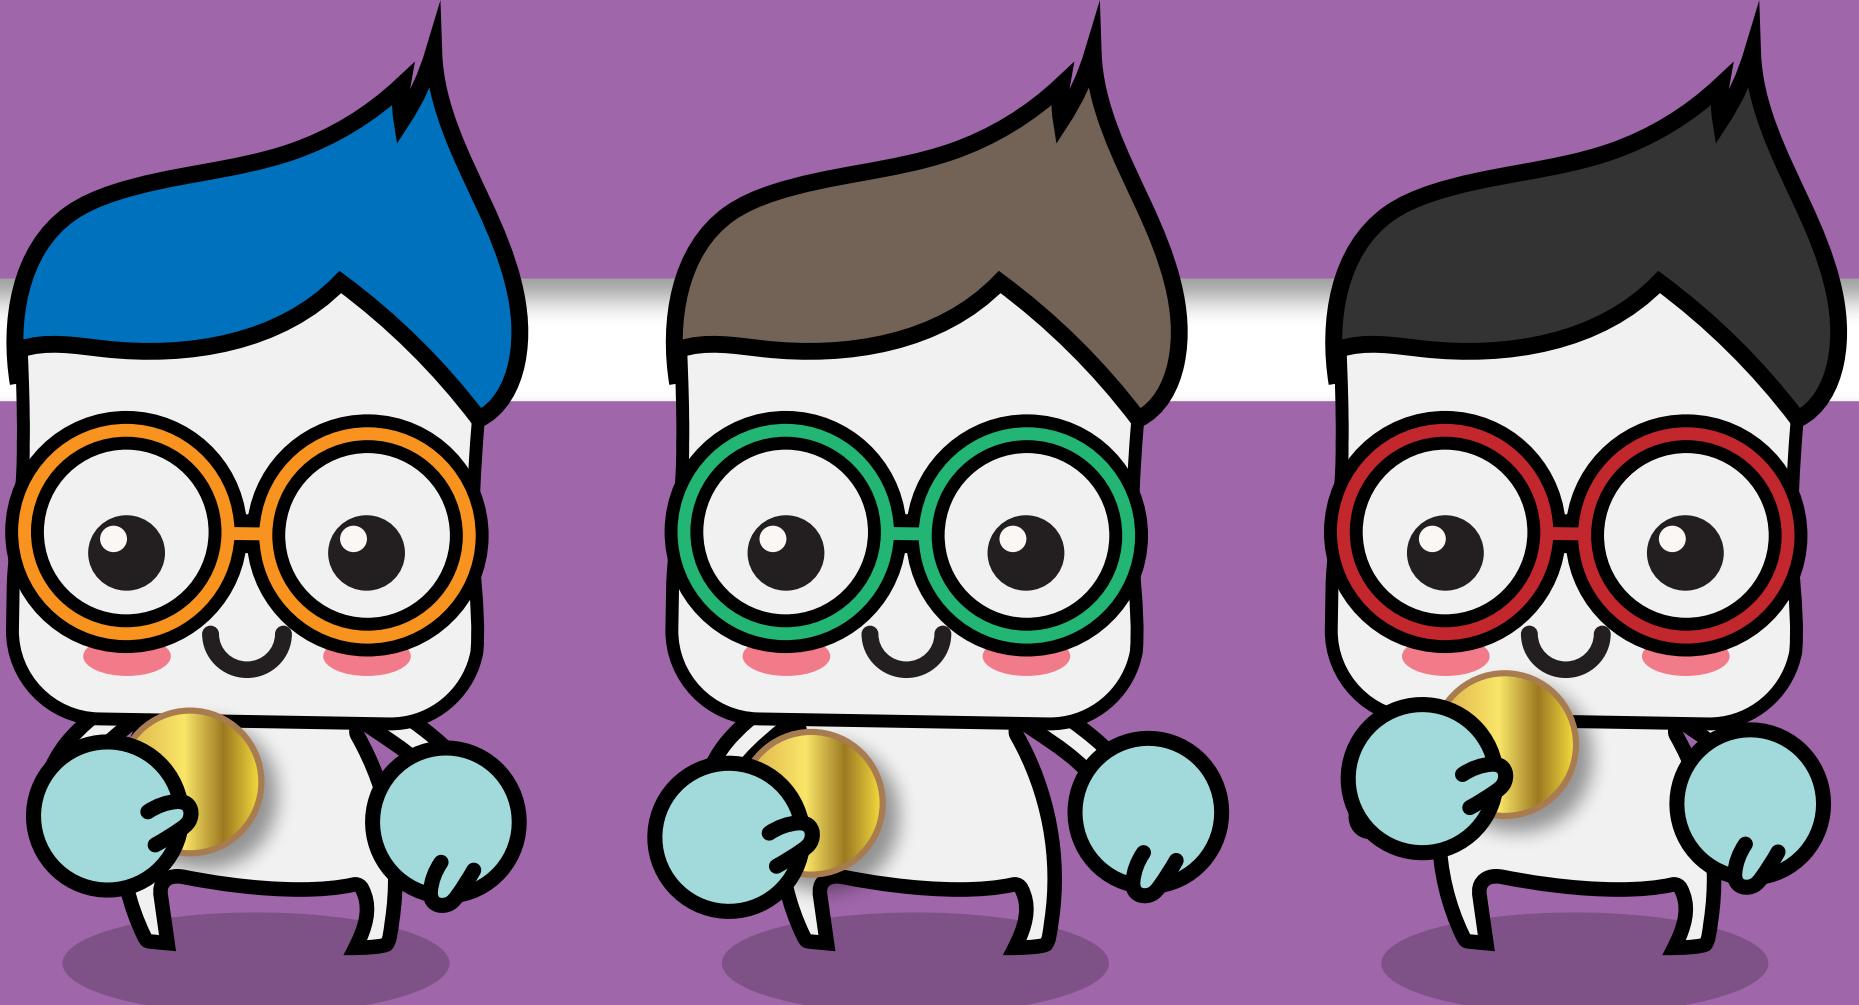

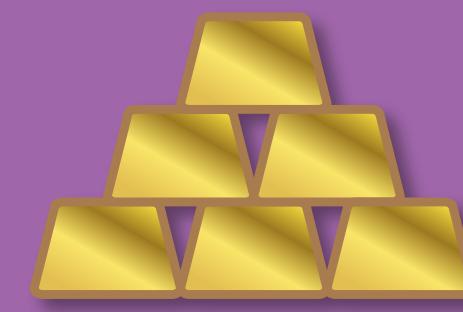

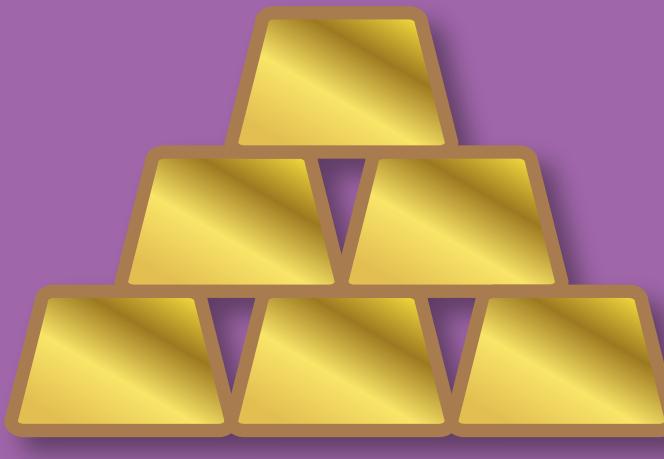

BASE REWARD

There is a fixed daily reward issuance of FNX

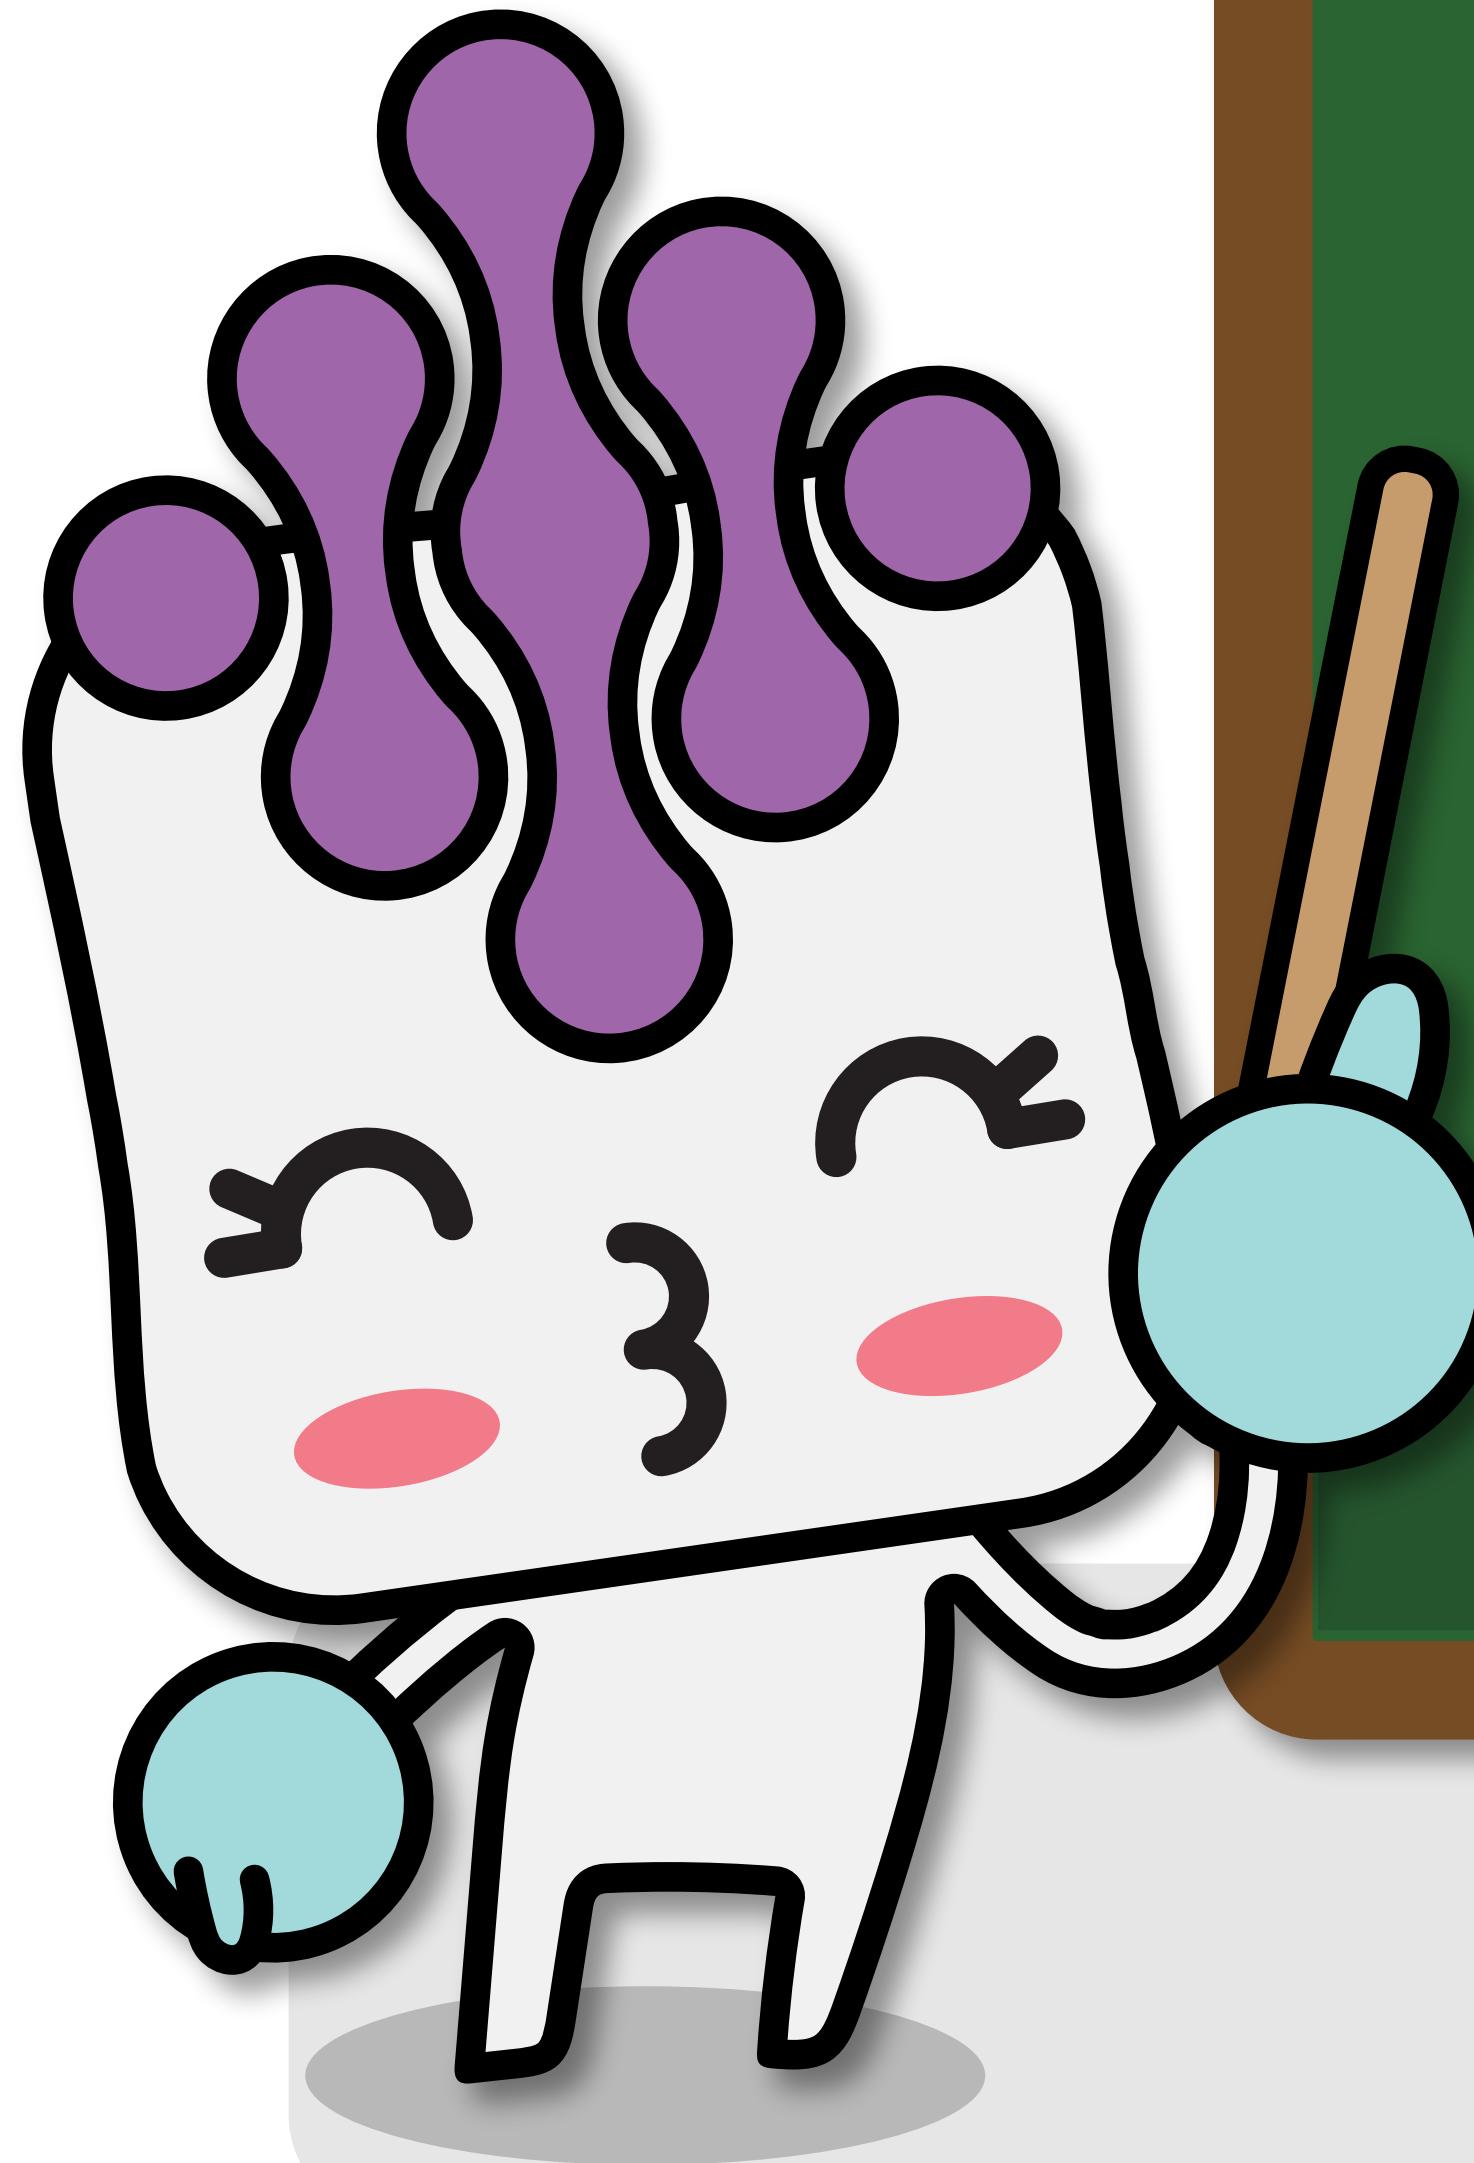

The higher the mining score,
The higher the reward share

The lower the mining score
The lower the reward share

The daily rewards are shared proportionally to each participant's mining score

Base Reward =
Total daily reward
×
your mining score
the total mining score

Getting a higher mining score!

One FPT-FNX = 1 point

One FPT-USDC = 1 point

Each set of 10 FPT-USDC & 1 FPT-FNX = 200 points

BASE REWARD

A set consists of 1 FPT-FNX and 10 FPT-USDC.

The score of one set equals 20 times the set's overlapping score.

The overlapping score of 1 unit of FPT-FNX

and 10 units of FPT-USDC is 10. 10 times 20 = 200.

User's mining score =

$$\text{AMT}_{\text{FPT-USDC}} + \text{AMT}_{\text{FPT-FNX}} + \min(\text{AMT}_{\text{FPT-USDC}}, 10 \times \text{AMT}_{\text{FPT-FNX}}) \times 20$$

The base reward is maximized with a FPT-FNX to FPT-USDC ratio of 1:10

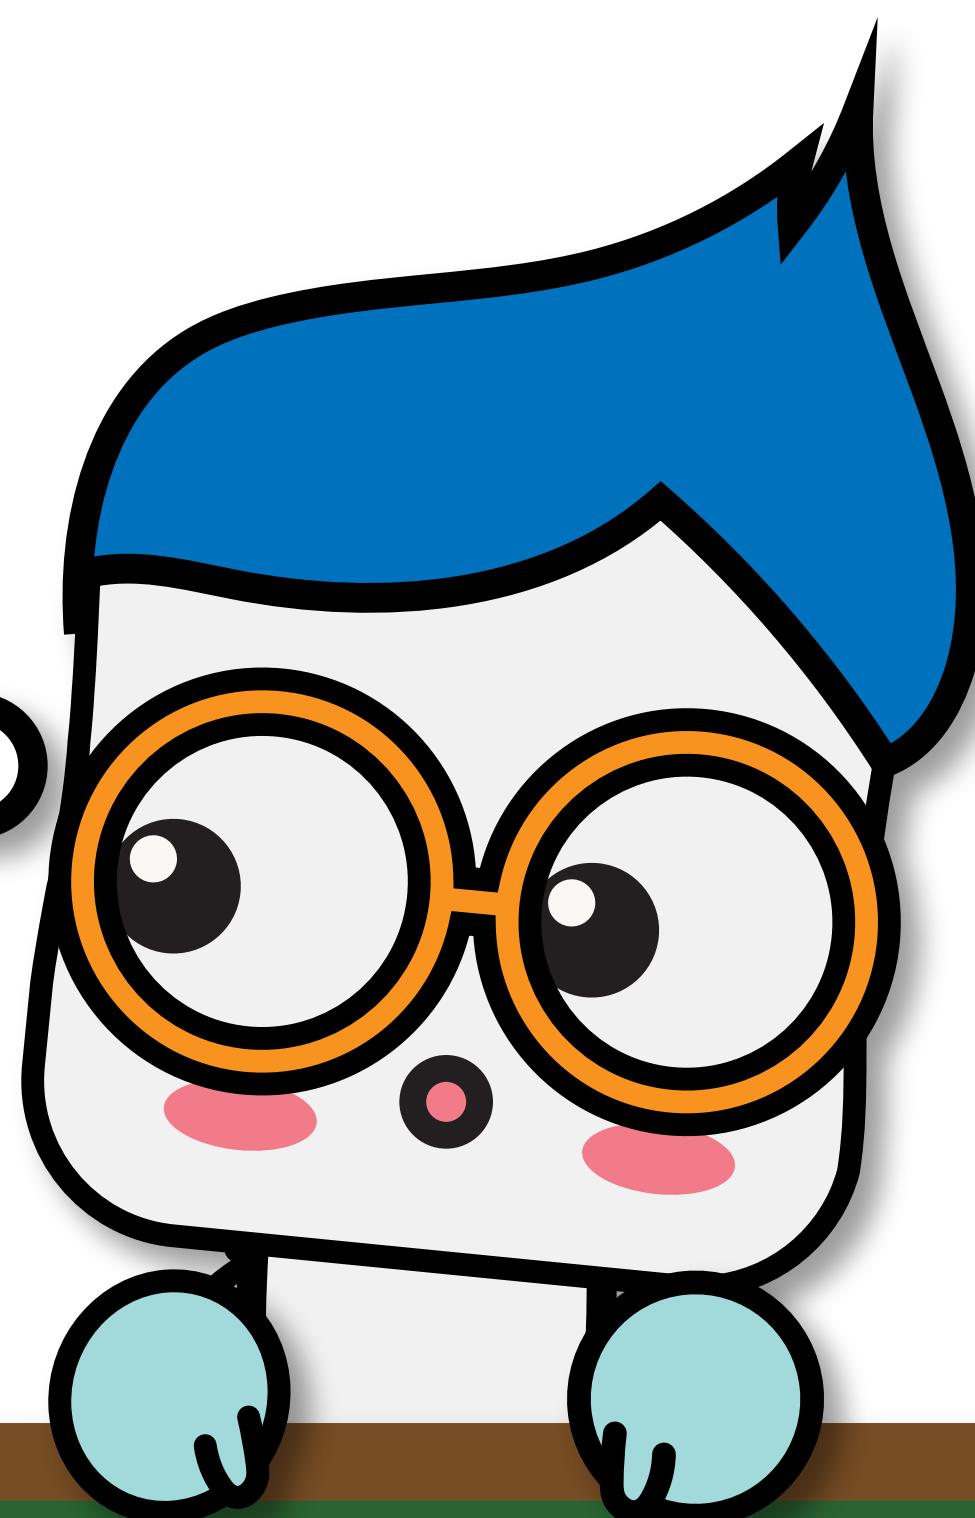

BASE REWARD

Example

FNX price is \$0.10 and USDC price is \$1.00.

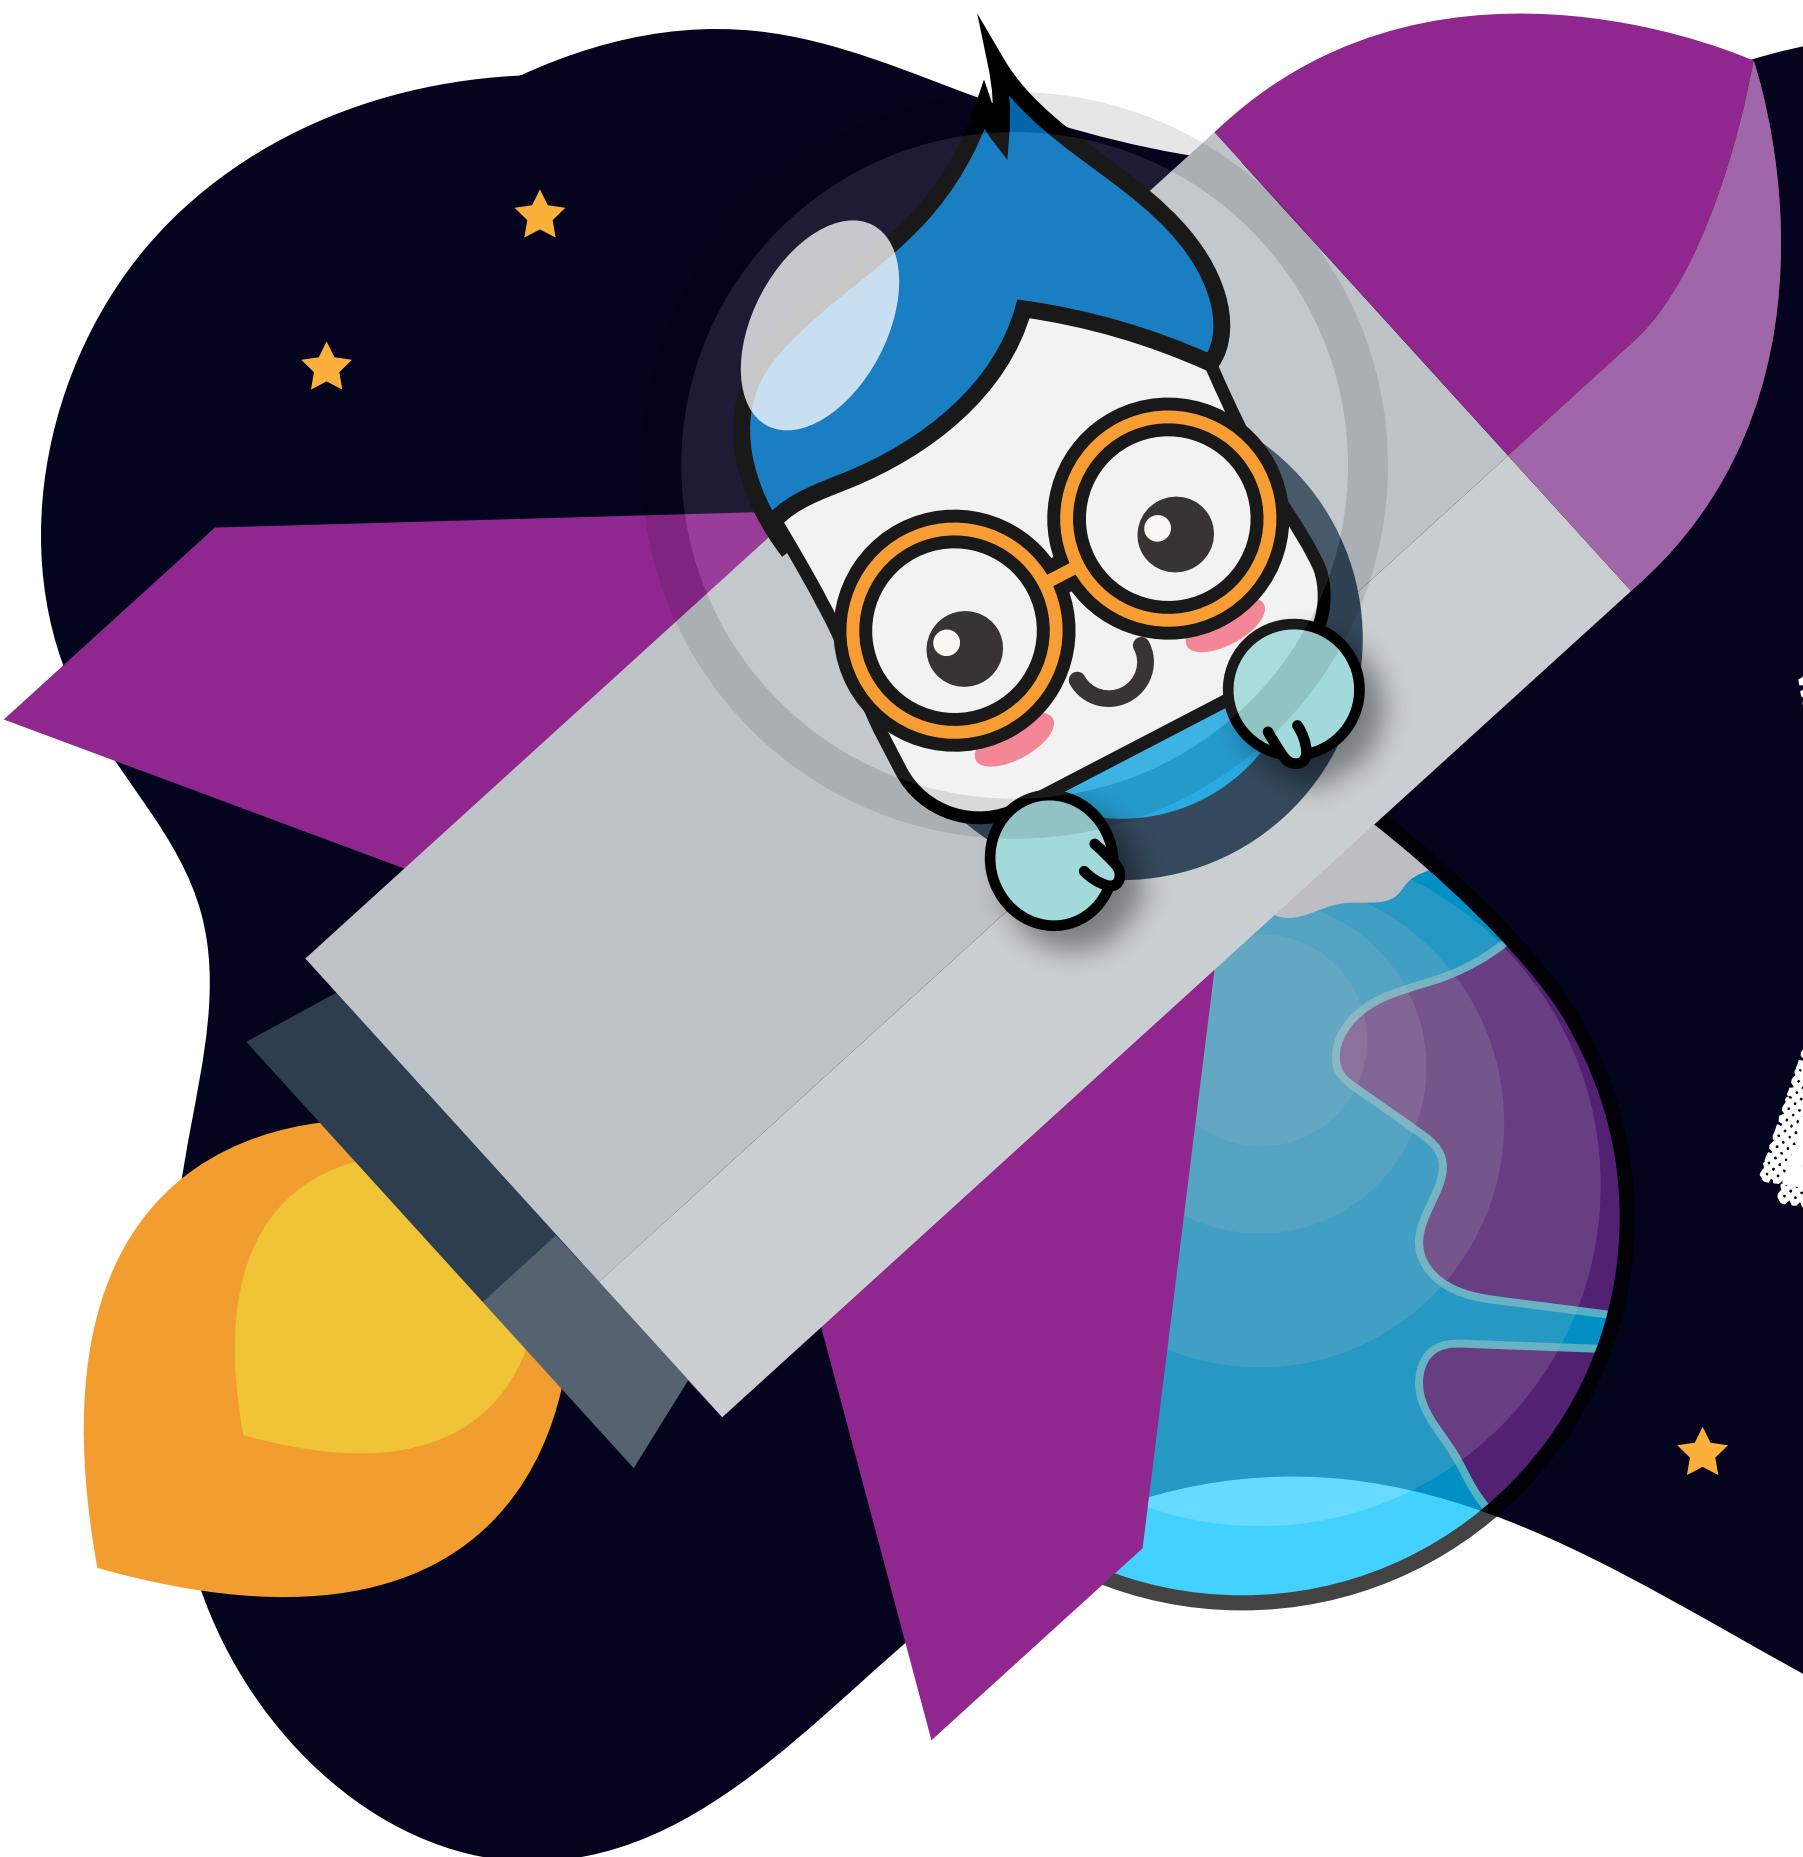

The daily basic mining is 20,000 FNX.

There are 6 users each of whom decides to put 400,000 USD in mining.

USDC / FNX ALLOCATION	USDC POOL	FNX POOL	APR BASIC YIELD
ALL IN USDC	\$400,000	\$0	4%
19:1	\$380,000	\$20,000	42%
10:1	\$363,636	\$36,364	72%
1:1	\$200,000	\$200,000	42%
1:4	\$80,000	\$320,000	19%
ALL IN FNX	\$0	\$400,000	4%

Please refer to the calculation here (https://docs.google.com/spreadsheets/d/1r3K7cMjx05vo_4soRhxBtLCcBNXYR6tgV-AsBh21N9E/edit?usp=sharing).

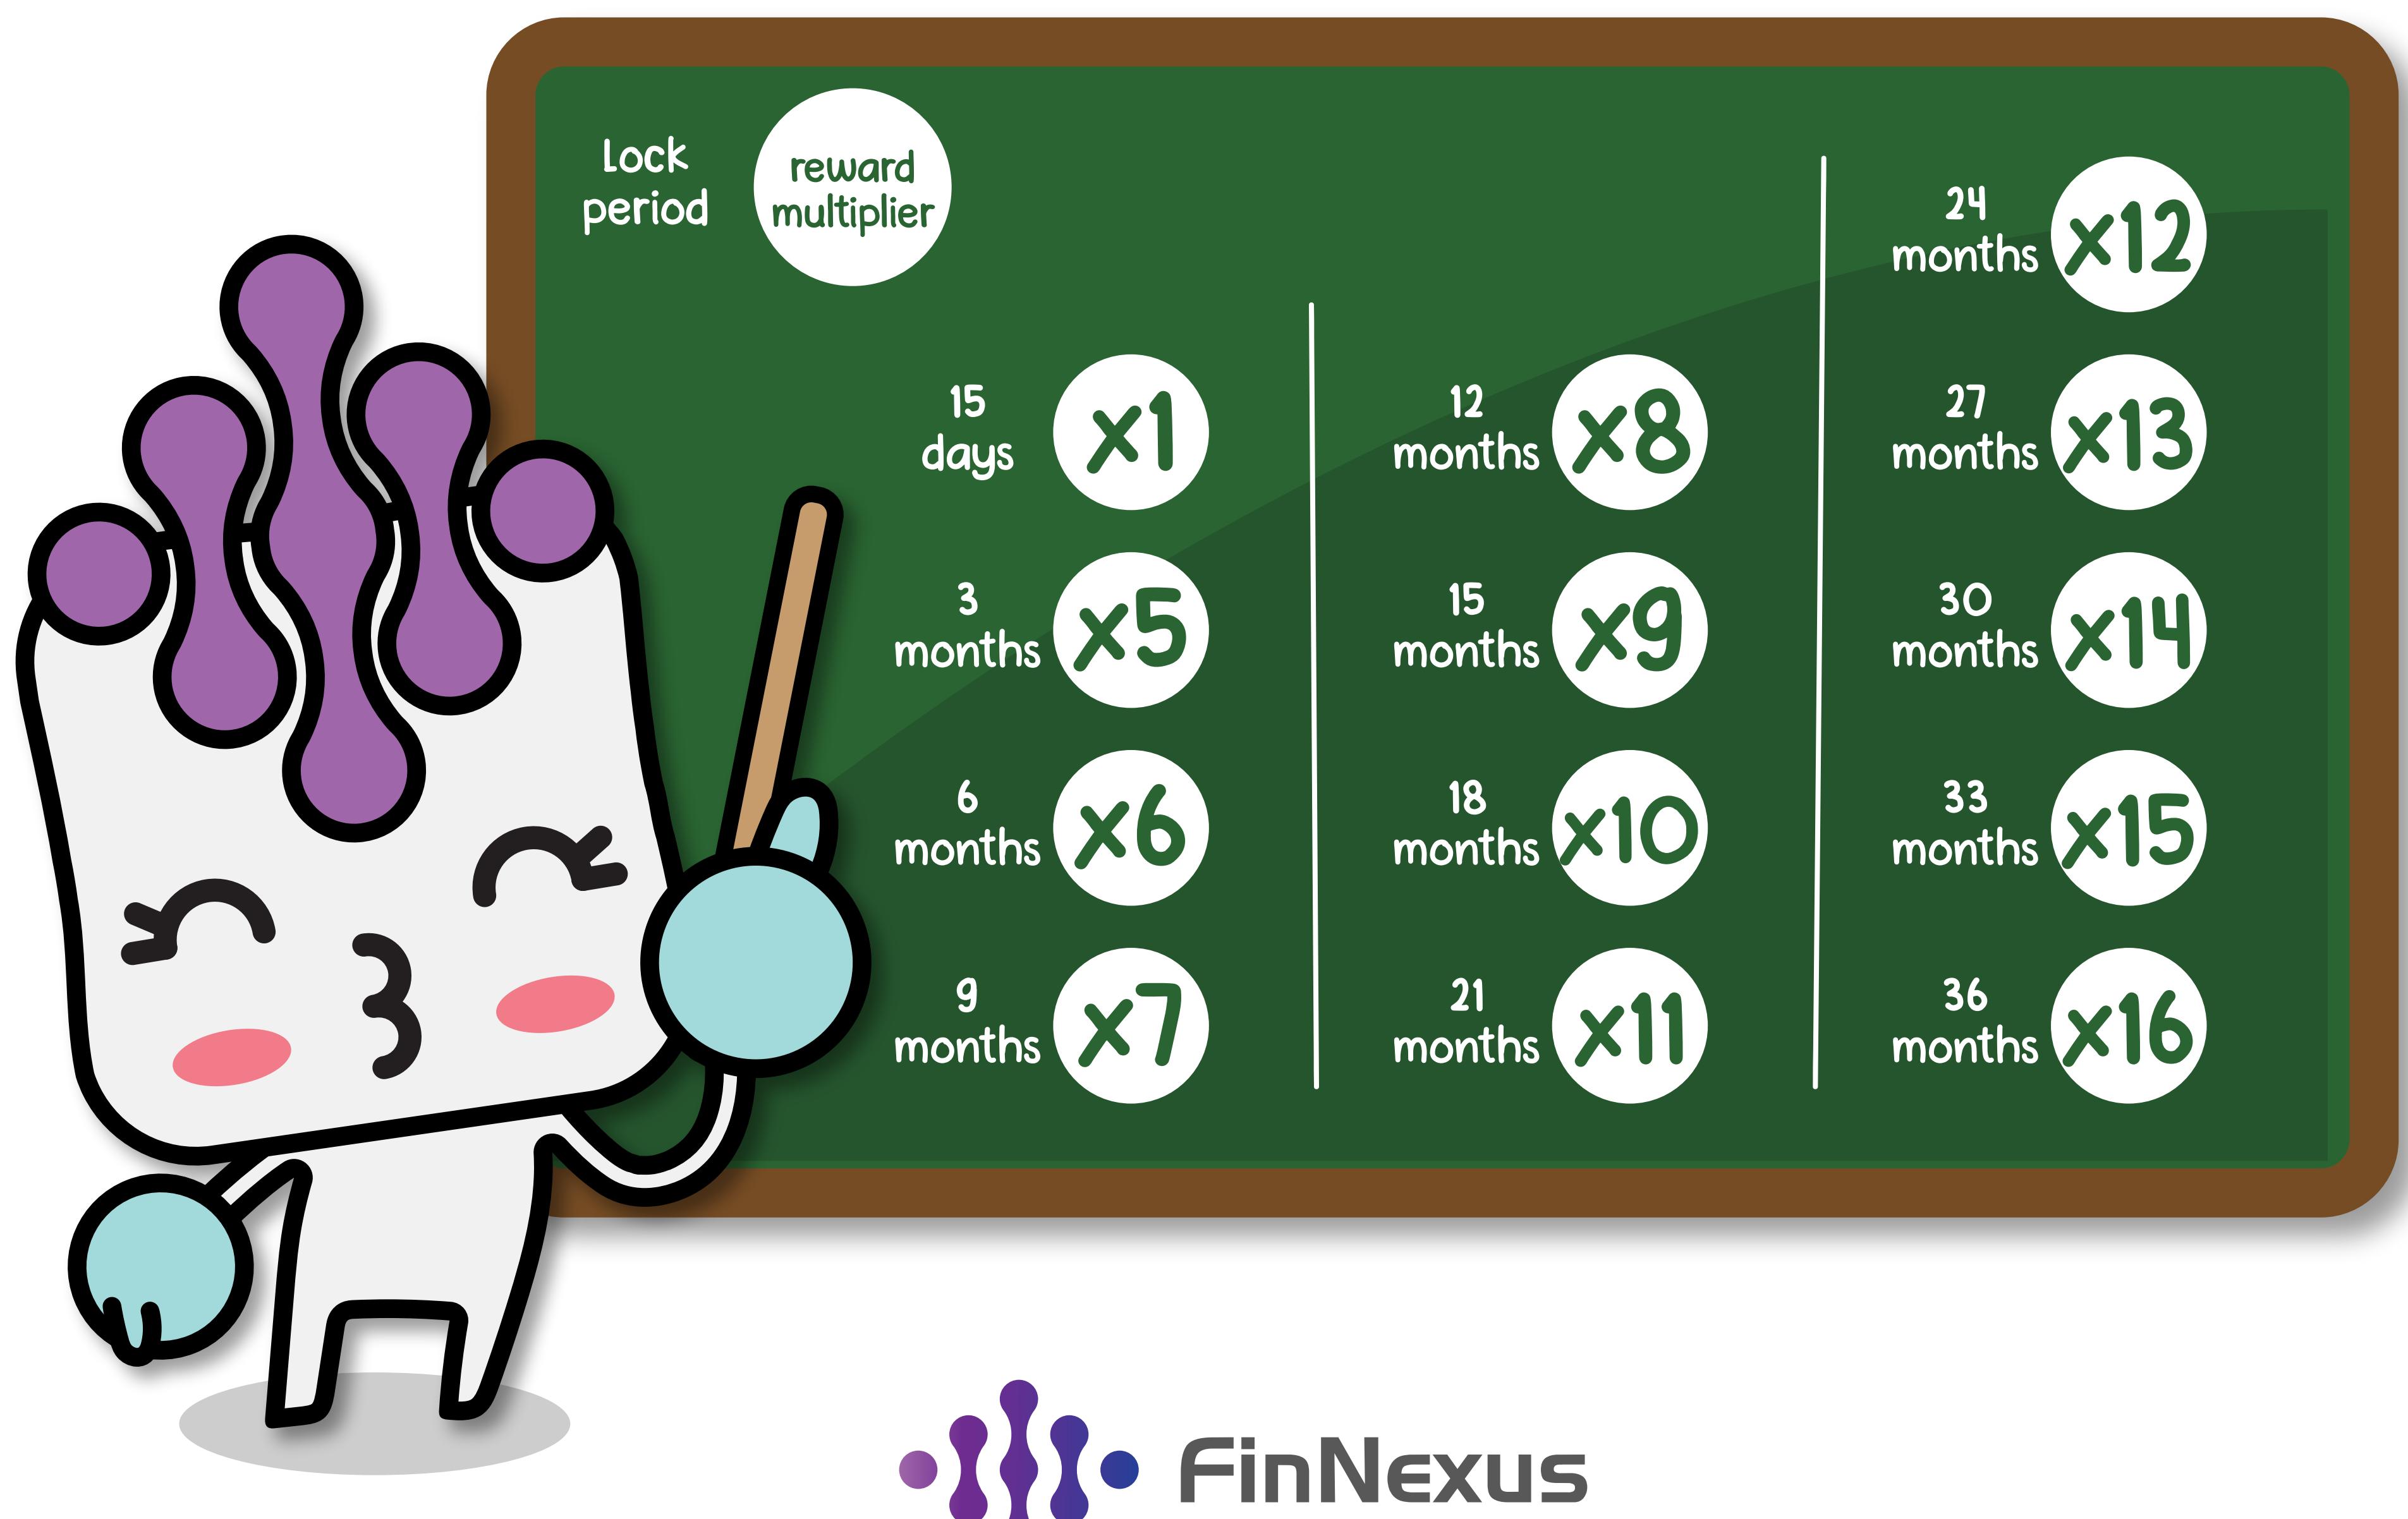

Rewards can be boosted with the **LOCK TIME MODIFIER**

Mining can be **MULTIPLIED** by locking FPT-FNX
The longer the time, the higher the boosting factor

Total Reward =
Base Reward \times Lock time modifier

LOCK TIME MODIFIER

Following the previous example

USDC / FNX ALLOCATION	APR BASIC YIELD	LOCKING	MULTIPLIER	BOOSTED YIELD
ALL IN USDC	4%	NA	1	4%
19:1	42%	18 months	10	420%
10:1	73%	12 months	8	584%
1:1	42%	3 months	5	210%
1:4	19%	36 months	16	304%
ALL IN FNX	4%	6 months	6	24%

VESTING MECHANICS

cFNX

Mining rewards are distributed as
cFNX

cFNX

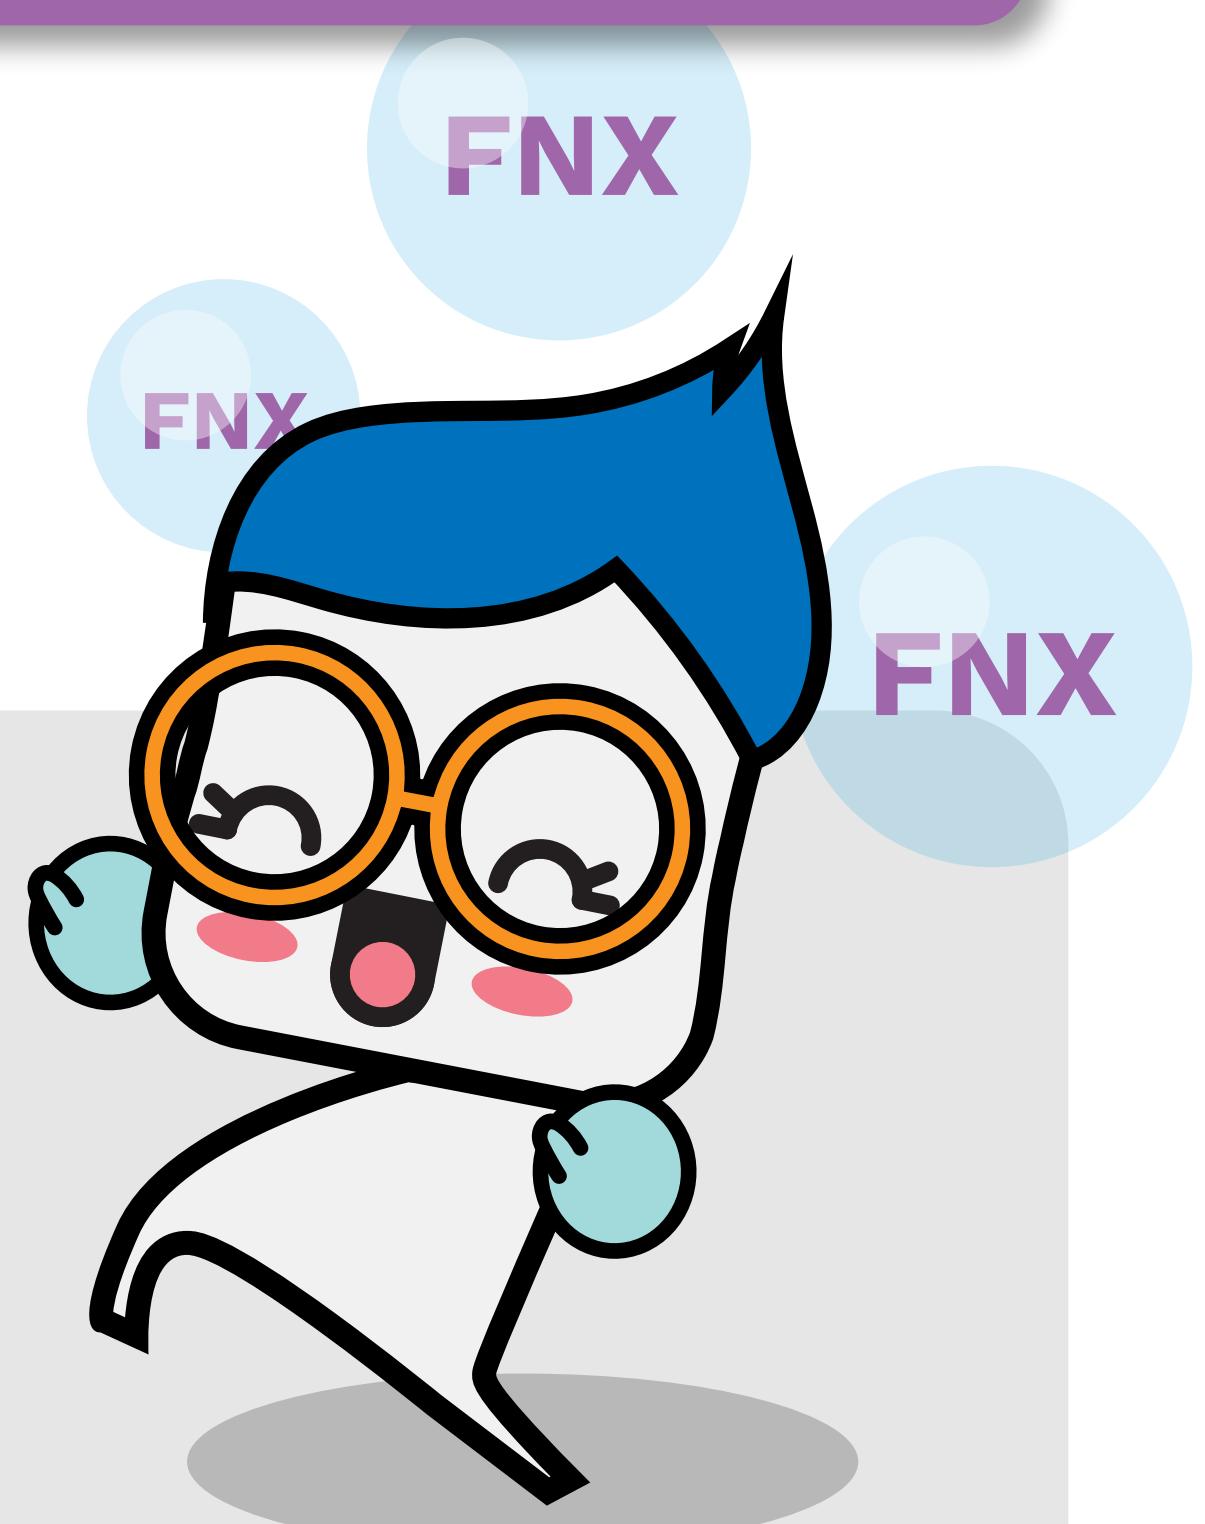

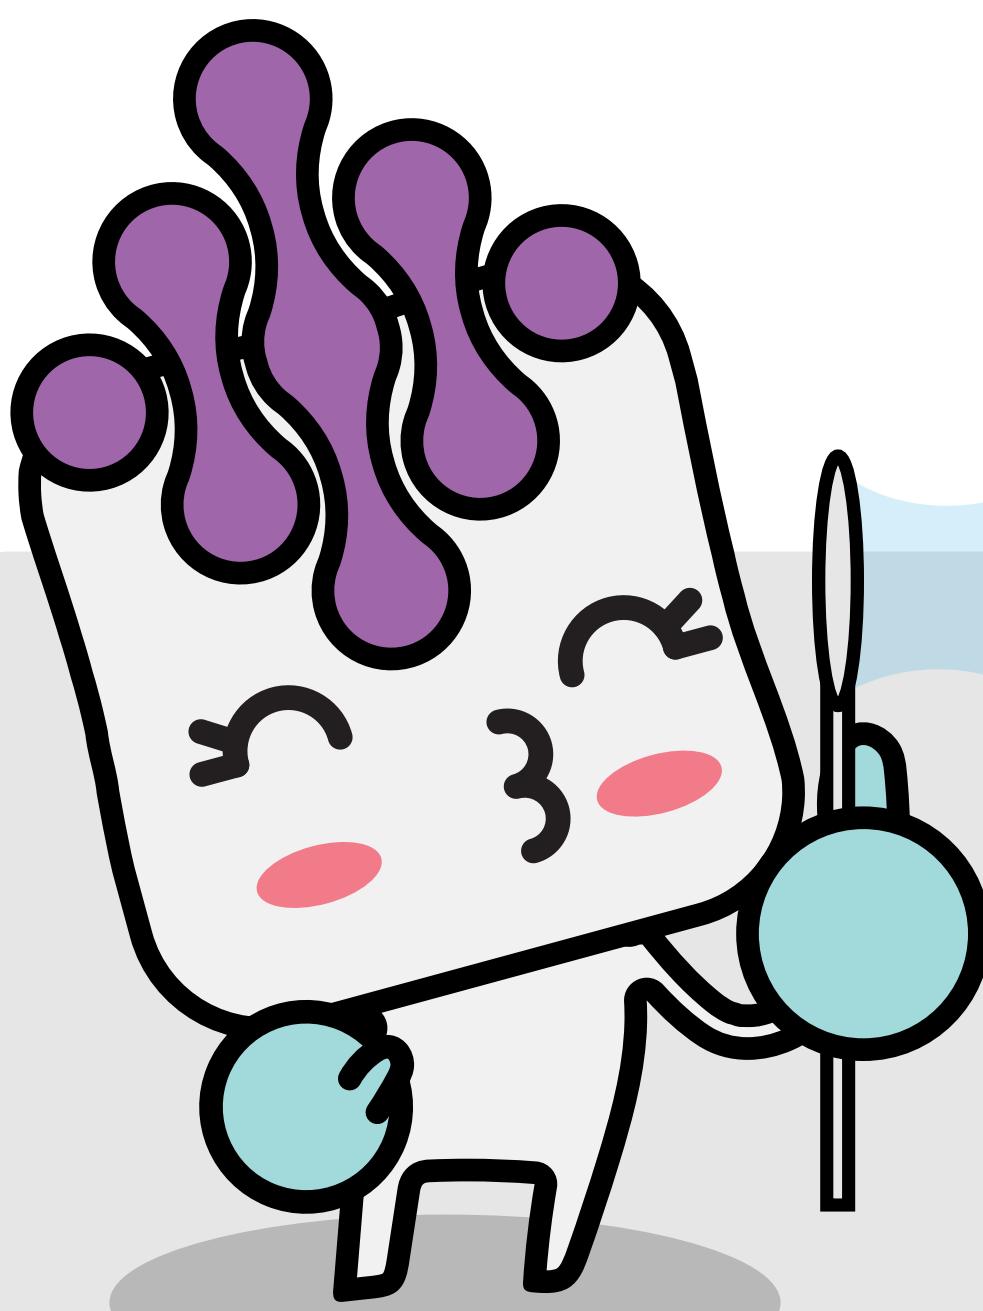

cFNX is "Convertible FNX" and
can be converted to FNX at 1:1

cFNX is transferable

Once transferred to the conversion
contracts, cFNX is burnt
and 1/6 FNX can be claimed monthly
over a period of 6 months.

THANK
YOU!!!
